Dear Dr. Do,

Each year, the editorial team at *Biological Psychiatry* participates in the selection of nominees for the Ziskind-Somerfeld Research Award. This honor is awarded annually by the Society of Biological Psychiatry to recognize outstanding research investigations in biological psychiatry. The nominated articles are selected from all published original research articles in a given year, which is a daunting task considering that the *Journal* publishes approximately 300 articles annually, the majority of which are eligible for nomination. The Society's Award Committee selects the winner and although your article was not ultimately selected for the award, it was a finalist in this process. This is a strong reflection of the quality of the science you and your colleagues have published, along with the interest it has generated, and we wished to congratulate you on this accomplishment. We look forward to publishing more of your very best work in the future.

On behalf of the entire editorial team,

Rhiannon Bugno
Managing Editor

BIOLOGICAL PSYCHIATRY

~HONORABLE MENTION~

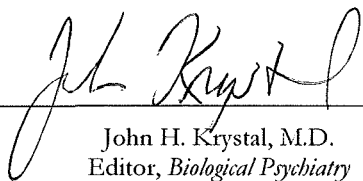

PRESENTED TO

Early-Life Insults Impair Parvalbumin Interneurons via Oxidative Stress: Reversal by N-Acetylcysteine

By Jan-Harry Cabungcal, Pascal Steullet, Rudolf Kraftsik, Michel Cuenod, and Kim Q. Do

For selection as a finalist for the 2014 Ziskind-Somerfeld Research Award

Given this 1st day of June, 2014

John H. Krystal, M.D.
Editor, *Biological Psychiatry*

Ned H. Kalin, M.D.
President, Society of Biological Psychiatry
